African ccTLD Workshop “Building Local Internet Community”
Hosted by Egypt's National Telecommunications Regulatory Authority “NTRA”
28th - 30th May 2007, Mövenpick Resort Cairo-Pyramids, Cairo

9th May 2007

Dear Sir/Madam

Subject : Invitation to African ccTLD Workshop “Building Local Internet Community”

African Top Level Domains Organization "AFTLD" acts as a focal point for all the African TLDs Managers, to discuss matters of policy that affect Afrian ccTLDs Registries and provide a forum for exchanging of experience and best current practices. AfTLD in cooperation with Egypt's National Telecommunications Regulatory Authority “AfTLD” is organizing the First African ccTLD Workshop “ Building Local Internet Community” in Cairo from 28th to 30th of May 2007.

AFTLD workshop main objective is to offer advanced training and exchange of best practices between African Country Code Top Level Domain operators/managers, ISPs and Governments, who are the participants in the process of developing and enhancing a national Internet infrastructure and provide assistance in building a strong local Internet services by promoting and utilizing country’s top level domain.

We believe that this Workshop will contribute invaluably to informing professionals and policy makers on the future shape of services, skills and knowledge necessary to build local Internet communities and promoting the use of African national TLDs.

We look forward to welcome you in Cairo and to AfTLD African ccTLD Association.

Yours sincerely,

Michuki Mwangi

President: AfTLD
